

STONE® HD CCTV Tester

High performance tester for both IP Camera and Analog camera.

Senior enjoy with dual channels
Not only HD IP testing, but also HD Analog testing is your need.
Two-in-one, no photo miss.

Display IP Camera image directly.
Modify IP address and other setting easily.

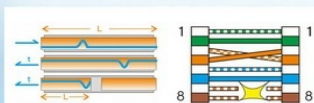

Unique POE Function
One line connecting POE
Just a network cable to transmit data signals, meanwhile to provide such equipment with dc power supply.

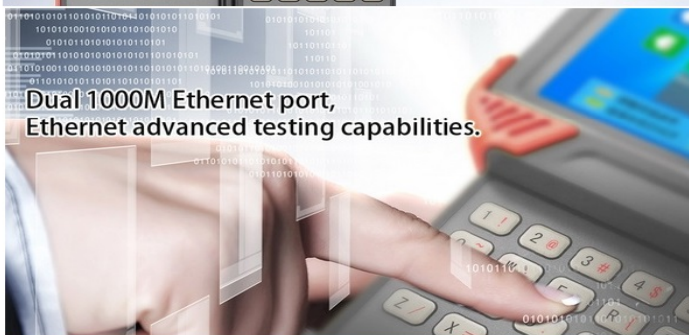

Cable breakpoint testing

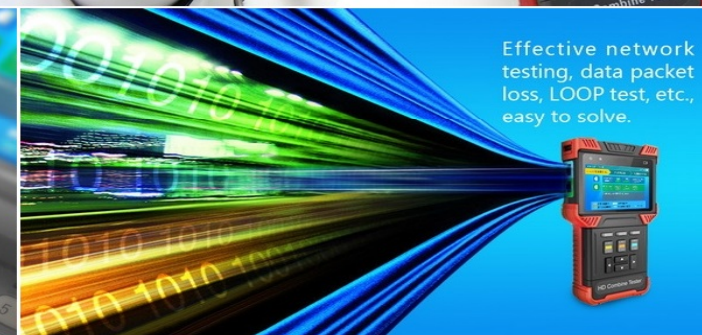

Cable echo check
High Precision of fault point location —accurate to 1 meter

Dual 1000M Ethernet port,
Ethernet advanced testing capabilities.

Effective network testing, data packet loss, LOOP test, etc., easy to solve.

Flip Keyboard Design

Enter different operational orders.

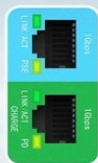

Port 1 POE Connector

48V power supply output, to provide POE power for IP camera directly.

Port 2 PD electrical interface

Measure POE Supply Voltage, meanwhile recharge for CCTV Tester.

Replaceable Lithium polymer battery

- High capacity
- Easy to replace
- More convenient

Soft Protection Design

Protect device from dropping and bumping in real-time

Dual LED Lights

To add a luster for you when necessary

12V/2A Power Supply

Designed for high-power camera
Supply Emergent Work Power in Real Time
