

STONE[®] Mobile Solar Powered CCTV System

Using IP camera and wireless router, direct powered by solar panel. Able to run 2 continuous raining days. View the image 24/7 direct from any computer or iPhone from all over the world.

Our CCTV Solar Panels are Eco-Friendly as they use 100% renewable resources i.e. the Sun and have no reliance at all on fossil fuel, so the energy produced is clean, free from pollution and abundant.

How Solar Works

Customised solar panel structure system

Customised extension pole for camera

80ah deep cycle rechargeable batteries

Customised high grade solar cabling

High quality solar charge power controller

High Definition Digital Video Recorder with 1TB hard disk

High Definition Infrared Weather-resistance Camera

4G mobile router & built-in mobile broadband sim card slot

Remote access function c/w ip domain. Viewing via smartphones, iPhone & Computer

Another use is for rapid deployment of CCTV or temporary installations for shows and other events and venues. The cost saving over buying and installing a hard wired system for temporary or remote locations is immense and once you have finished with it at one location you simply move it to the next.

Fully Customized To Your Meet Your Requirements!
