

STONE® ST-HPC005 Infrared Wireless People Counter

Advantages for HPC005

1. LCD Screen

Data is shown on LCD screen directly, in and out data.

In data

Out data

2. Wider range

It can be used for a gate with 1-40 meters' width.

3. Battery capacity

AA battery which we offered can work up to 1.5 year. Customers can replace by themselves, or buy from us. General 1.5V-3.6V AA batteries are all workable.

STONE® ST-HPC005 Infrared Wireless People Counter

4. Strong anti-light ability.

Greatly decrease the counting error affected by light, higher accuracy rate

5. Strong glass (door) penetrating ability

It can work well behind an open glass door. No limit for the door.

6. More confidential data transfer

TX-RX transfer data to Data Receiver is strongly encrypted, much safer.

7. Appearance

Compared with the old model HPC004, HPC005 is more fashionable.
Built-in screws

8. Surface

Surface can be printed with any logo or design.

9. Obstacle indication

If the infrared ray is blocked, there will be indication on the LED screen and the red light on the RX will keep flashing. As below picture shows:

10. LED Display is possible

You could show the data on a outside LED display. A protocol will be sent for this.
